CENTRAL COMPRESSORS

The experts in high-pressure compression

Central Compressor Consultants has established an enviable reputation for the supply of compressor expertise and equipment to the manufacturing, offshore, seismic, power generation, fire and rescue and scuba diving industries.

As specialists in high compression we offer a range of solutions for all gas and air applications up to 6500 psi, from the hire of portable compressors to purpose-designed systems for demanding applications such as offshore oil and gas prospecting.

The CCC team has more than 200 years' collective experience in the high compression business. Our clients know us for our responsive service, the depth of our expertise and our ability to respond to technical challenges quickly and efficiently.
